100 YEARLING BULLS AND 38 TWO-YEAR-OLD BULLS

**GREEN**   
**MOUNTAIN**  
**ANGUS**

**ROONEY**  
 A N G U S

**TWO LEGACIES. ONE STANDARD.**

*Dear Friends,*

We hope this finds you well and having a prosperous year. It's been 52 years since our first bull sale in Sturgis, and now, three sales into our partnership with Rooney Angus, we're proud to carry forward two legacies with one shared standard: top-notch cattle and honest service.

It's a great time to be in the cattle business! Thanks to timely rains across the Northwest, our pastures have stayed greener and our feed commodities have increased. We are seeing record cattle prices due to the national cow herd being low and the high demand for quality beef. With that said, we believe the road ahead is promising for the cattle industry.

Our sale bulls have been fed in White Sulphur Springs at Rooney Angus' new bull development center. The aged bulls have been growing slow and steady. They are sound, strong and ready to work. The yearling bulls are doing what we have bred them to do and have shown their capacity for growth. Their feet have held up in rocky terrain.

This year we have an exciting line up of bulls, some you are familiar with like Armstrong and Wrangler. Wrangler brings calving ease and vigor while Armstrong adds growth backed by Chisum genetics. Jameson is a high growth bull with great feet and carcass traits. Connealy Commerce is a calving ease bull with outstanding growth. Congress has great feet, outstanding growth, and built for high altitude. This year we are offering 38 2-year old bulls, 50 18-month old bulls, and 150 yearling bulls.

As in the past, the bulls will be wintered, semen tested, and delivered at no charge in the spring. No matter what you are looking for- growth, maternal, carcass traits, or calving ease, this sale will have what you need.

Our heifer offering is the best we've ever put together—hand-selected from our registered herd, South Dakota commercial herd, and a customer rich in Green Mountain genetics. AI'd to top calving ease sires, DBA Authority 3122 and MRA Advocate 9035, and sorted into tight calving windows, these girls are good enough to throw in any herd and raise the kind of calves you'll be proud of.

We would like to thank you for considering us and letting us be a part of your program. We will continue to use all the available tools that are out there to produce the type of cattle that meet and exceed your expectations.

We invite you to visit our websites at [www.rooneyangus.com](http://www.rooneyangus.com) and [www.greenmountainangus.com](http://www.greenmountainangus.com)

Give us a call with any questions—we'd love to help you find the right fit for your herd.

**See you at the sale on November 10th,**

*Tim & Kris Todd Family and Steve & Karen Rooney Family*

**Tim & Kris Todd and Family**

**Steve & Karen Rooney and Family**

# ANNUAL PRODUCTION BULL SALE FRIDAY, MARCH 13, 2026

**1:00 PM MT // PAYS, BILLINGS, MONTANA**

**SELLING 140 BULLS**  
**Yearlings Bulls • Two Year Old Bulls**

Sale will be broadcasted on

(866) 313-0123

AUCTIONEER: Roger Jacobs

#### REPRESENTATIVES:

Kurt Kangas.....American Angus Assn & Angus Journal  
John Goggins.....Western Ag Reporter  
Kevin Murnin.....Western Livestock Journal  
Don Ravellette.....RPI Promotions  
Jaramie McLean.....Tri-State Livestock News

#### DELIVERY

Free delivery on all bulls. We will try to deliver cattle to your ranch. In cases of inclement weather conditions, we would request that you meet us at a suitable place for both parties. Please leave your complete mailing address, phone number and directions to you ranch.

#### INSPECTION OF CATTLE

Cattle will be available for viewing on Saturday, Nov. 8th at the Public Auction Yards.

#### HEALTH

Pyramid 5 - Vision 8 Somnus & Nuplura at branding and weaning & Nalsalgen & Multimin. Bulls will have 2 rounds of Fusogard before spring delivery.

#### LIVESTOCK MORTALITY INSURANCE

Mortality insurance will be available for your purchases at the sale

#### LOT NUMBERS

Lot numbers will correspond with the lot number in the catalog.  
**Low birth weight bulls will have white ear tags and cow bulls will have green tags.**

#### BUYERS THAT ARE UNABLE TO ATTEND SALE

Buyers may send their bids to the field representatives or Auctioneer. Bids will be handled as if you were present.

GREEN MOUNTAIN ANGUS & ROONEY ANGUS RETAINS ONE THIRD REVENUE SHARING INTERESTS IN EACH BULL SELLING. BUYER HAS 100% POSSESSION AND 100% SALVAGE VALUE.

#### SALE DAY PHONE:

Tim Todd: (406) 220-1975  
Jeremiah Moxley: (802) 565-0177  
Tyson Lind: (406) 241-6922

#### SALE HEADQUARTERS

Public Auction Yards  
1802 Minnesota Ave  
Billings, MT 59101

#### FOR RESERVATIONS

Contact Green Mountain Angus  
(406) 220-1975

#### LUNCH

A complimentary lunch will be served at PAYS.

\*\*\*\*\*  
\*FREE DELIVERY ON ALL BULLS &  
FREE WINTERING ON ALL BULLS\*

#### THE GUARANTEE

All bulls will be covered 50% by Green Mountain Angus & Rooney Angus if they are injured during their first breeding season and unable to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided, or if a buyer prefers credit towards a bull in the following year's sale, 50% of the value of the injured bull, minus one-half salvage value will be given as credit. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1st, 2026.

#### TERMS & CONDITIONS

This sale is being conducted under the suggested terms and conditions adopted by the American Angus Association effective March 16, 1992. Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for particular purpose with respect to the cattle being sold in this auction. The warranties and guarantees set forth in the "Terms and Conditions" are in Lieu of all warranties, either expressed or implied and remedies provided there in shall be the sole and exclusive remedy of the buyer (or any party claiming through buyer) for all other obligations or liabilities. A copy of the Association Terms and Conditions will be available sale day for inspection.

Carcass EPDs

### DNA Scores

CED	BW	WW	YW	DMI	YH	SC	DOC	HP	CEM	MILK	MW	MH	CW	MRB	RE	FAT	TND	CLW	ANGL	HS	PAP
43	10	82	86	31	96	58	18	85	76	50	95	99	49	3	66	84	66	33	12	27	2

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## PRODUCTION EPDS

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## MANAGEMENT EPDS

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**Claw Set EPD (Claw)**, is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

**Foot Angle EPD (Angle)**, is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

**Pulmonary arterial pressure EPD (PAP)**, is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

## MATERNAL EPDS

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Teat Size EPD (Teat)**, expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

TWO LEGACIES. ONE STANDARD.

## MATERNAL EPDs

**Udder Suspension EPD (UDDR)**, expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

**Functional Longevity EPD (FL)**, expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

**Cow Energy Value (\$EN)**, expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS EPDs

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires. Group/progeny (C Grp/ Pg and U Grp/Pg) reflects the number of contemporary groups and the number of carcass and ultrasound progeny included in the analysis.

## \$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle. **Weaned Calf Value (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

**Beef Value (\$B)**, a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

**Combined Value (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

# Driving the science of better breeding

**There's little room for error in the cattle business.** You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI™) provides it through genomically-enhanced expected progeny differences (GE-EPDs). GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association™, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they had recorded 9-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Heifer Pregnancy	28
Calving Ease Maternal	18	Maternal Milk	33
Birth Weight	22	Mature Weight	14
Weaning Weight	25	Mature Height	9
Yearling Weight	20	Carcass Weight	13
Yearling Height	15	Marbling Score	10
Dry Matter Intake	12	Ribeye Area	11
Scrotal Circumference	12	Backfat Thickness	11
Docility	10	Teat Size	12
Foot Claw Set	13	Udder Suspension	13
Foot Angle	12	Pulmonary Arterial Pressure	7
		Hair Shed Score	10

## How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50K by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

Low birth weight calving ease bull for your heifers or your 2's and also a minus PAP EPD. The Commerce sons around the industry have really attracted cowmen wanting big-ribbed cows that will wean heavy calves. Several to be offered in this sale and upcoming sales for your review. This wide based bull will catch your eye!

Another Commerce to one of our "anchor" donors that topped the NILE females sale in 2021 from the Sitz program. He was born above 8,200' then moved to the Camas Creek Ranch as a calf and has thrived and understandably so with a Top 1% of the breed for PAP EPD and backed up by a low actual PAP reading. He was built for high altitude and be sure to keep the daughters.

This bull is a son of Rooney raised herd bull RAR Rectify from a daughter of Rooney senior sire VAR Power Play. A unique fall-born heifer bull with Top 10% CED and Top 10% WW and Top 10% \$Combination. He is a long-bodied bull with some maturity to go cover a lot of heifers. His sire Rectify has been used on a lot of commercial heifers in Colorado and Nebraska as well as at Rooney Angus with virtually no assists!

This one is one of those freaky fronted kinds of bulls, with that extra style that makes him a front pasture kind. Armstrong is one of the top sires in the breed for siring females with exquisite look and sons that have upper end power you deserve. Lot45 has a negative BW with very good YW, a Top 4% scrotal, excellent CEM, top 2% milk, top 10% fluid longevity, outstanding docility, very good foot scores, excellent PAP to go along with outstanding dollar values.

This son of the \$425,000 Executive is bold sprung, full of meat, with a Top 2% PAP EPD. His dam was the top-selling female in the NILE sale in 2021 and has been a prolific donor with each sire used with her. The Top 4% \$Maternal index along with balance across all the traits says "keep the heifers". If you like bulls with capacity and bold sprung volume you will like this group of full brothers.

This stout, RAR Relentless, red-meat bull is another that has been a good one every day and weaned at 815# at 189 days from a moderate framed powerful dam by the Rooney sire VAR Power Play 7018, the record selling sire from Vintage Angus. He has a powerful full sister that was one of the top WW heifers and eventually headed to the donor pen for ET. A bull with low PAP, high marbling, with a Top 3% \$Maternal Index of +\$103\$M. Don't miss him, he really shows the Conneally Confidence Plus in him.

Here's our first Badlands calf, he has outstanding growth, looks to be a cow bull with very balanced EPD throughout. Lot 59 traces back to Wrangler and Spur two tremendous female sires. Lot 59 has top 3% YW and top 4% WW, top 3% scrotal, excellent milk, very good fluid longevity, outstanding foot scores, tremendous docility with balanced dollar values.

Here is a very stout, powerful Authority son who is the young sire of this program that has really started to take off and he is definitely a move for the better, as he has brought tremendous balance and power to the entire calf crop. Lot 60 has a double digit CED with a negative BW, excellent HP, top 3% milk, very good teat and udder scores, tremendous fluid longevity, balanced foot scores, negative PAP with very good dollar values.

Take a look at this young Foundation son. He traces back to the most famous cow family in the State of Montana, Basin Lucy. This is a cow family that has re-written the record books when it comes to income and quality. Foundation is really cutting his own path in the industry, he has topped many female sales in the past fall with sons demanding top end money. Lot 98 has top 2% YW, excellent scrotal, top 5% CEM, controlled mature height, very good foot scores, excellent PAP, top 1% CW, top 25% marbling with big-time dollar values.
